Chuck McKinnis

eComStation Maintenance Tool

Was it broken when you started?

How it all began

- eCS 1.0 GA
- IBM MCP 1 Fixpack 1
- Dialog Enhancer
- Theme Manager

The early efforts

- Rexx running under PM Rexx
- Apply IBM service
- Apply the Serenity updates

Today

- **VisPro Rexx**
- **Apply IBM service**
- **Apply the Serenity updates**
- **Install/Uninstall SMP support**
- **Install other IBM products**
- **Install device driver updates**
- **Download updates from
[ftp.ecomstation.com](ftp://ecomstation.com)**

Service Logic

- Determine eligible drives
- Determine eligible service
- Apply the service
- Apply Serenity updates
- Record applied service

Download Logic

- Determine eligible downloads
- Start download process
- Check download status

Current support

- IBM Convenience Package FixPak 2
- IBM OS/2 Base Device Drivers Fixpack 3
- Java runtime update o118-20011106
- OS/2 kernel update 14.091b
- Daniela Engert's IDE driver suite
- IBM IDE DASD drivers
- IBM USB Base Update
- IBM USB Mass Storage Device Support

Current support (*continued*)

- IBM Adaptec SCSI drivers
- IBM Java 1.3.1
 - JDK Runtime
 - JDK Toolkit
 - Web Start & XML Parser Features
- TCP/IP 4.32
 - IC32993 - Fix for TCP/IP installation
 - IC32802 - Trap in TCP/IP 4.3 stack

Current support (*continued*)

- IBM Web Browser 2.0 for OS/2
- IBM Peer for OS/2 (MCP 2, level 8605)
 - PTF IC31990, Fix for Peer (8605)

Tomorrow

- Support eCS 1.1
- Remove Netscape Navigator requirement
 - Java
 - TCP/IP
- Dynamically determine download requirements
